> 90%
MITRE ATTACK®
coverage

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

1H10

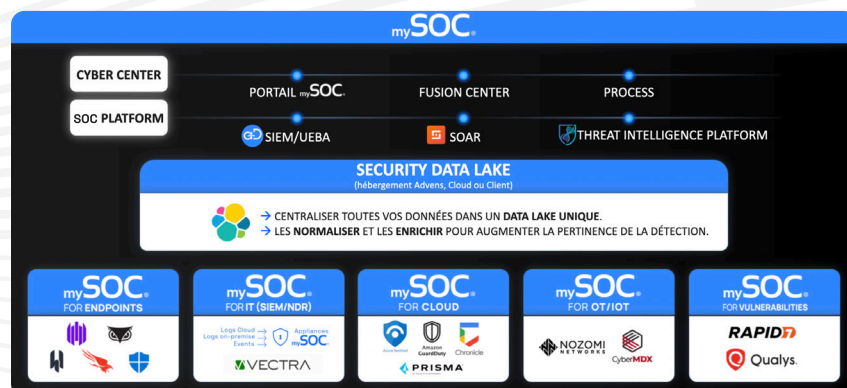

Response time
to a critical event

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection

« Voilà **trois ans qu'Advens opère le SOC de TF1**, trois ans au cours desquels Advens a démontré de nombreuses qualités : **rapidité des équipes** en charge du déploiement dans un contexte contraint, **efficacité et évolutivité** des solutions techniques déployées, **pertinence** des équipes de run. »

Jean GRAS • Directeur
des Opérations IT – TF1

- + Detection and qualification of security events 24/7
- + Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- + Continuous optimization with collective detection intelligence
- + Enrichment of detections by public and private CTI
- + Targeted and fast remediation thanks to SOAR playbooks

mySOC[®] for Cloud

Protect your cloud activities 24/7

mySOC for Cloud allows a global approach on all your cloud environments thanks to its extended visibility and the precision of its detection.

Protect dynamic and complex environments

Centralize all the protection of cloud environments

Understand native cloud attack techniques

- + 24/7 monitoring of your infrastructures, identities and data.
- + Correlate cloud events in a single monitoring plan
- + Precise, fast and adapted response directly in the targeted environments.

mySOC for Cloud relies on Cloud monitoring solutions

mySOC for Cloud protects you from:

- Malware and viruses
- Unauthorized access attempts
- Abnormal traffic patterns
- Unusual data transfer activities
- Malicious Employee Behaviors
- Advanced persistent threats

mySOC supports essential actions:

- + Cloud event monitoring
- + Cross-platform identity analysis
- + Correlation of on-premises and cloud activities
- + Unified visibility in a single monitoring plan

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
