mySOC® for IT (SIEM/NDR)

Protection of your information system 24/7, optimized by our experts

mySOC for IT centralizes, enriches and correlates data from your application, perimeter and infrastructure equipment to detect all abnormal behavior. Our analysts and detection engineers, augmented by our machine learning algorithms, support you until the complete resolution of security incidents.

Model and analyze security alerts	+	Understand the impact of attacks on equipment	+	Effectively manage incident resolution

+ **Reception, standardization and enrichment of logs and alerts.**
+ **Detections of IOCs and behavioral anomalies in your network.**
+ **Instant and accurate response to security alerts.**
+ **Full control of data storage and analysis costs.**

mySOC for IT analyzes all your logs and leading network sensors

mySOC for IT protects you from:

• Propagations in the information system
• Network malware deployments
• Data exfiltration

• Exploits of vulnerabilities
• Connections to malicious sites
• Dangerous executable downloads

mySOC supports essential actions:

+ **Feared incident monitoring**
+ **Qualification of reported security alerts and incidents**
+ **Multi-channel notification (ticket, email, SMS) of incidents**
+ **Information system security action plan**
+ **Remediation on equipment (FW, Proxy, AD)**

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
