

mySOC[®] for Vulnerabilities

Reduce your risks by controlling your vulnerabilities

To reduce the attack surface, mySOC for Vulnerabilities creates an inventory of the vulnerabilities present across all your IT, web and cloud environments. Our cyber experts support your teams in orchestrating scans, prioritizing flaws and managing their correction.

Analyze heterogeneous environments individually

Run scans without disrupting operational activity

Prioritize and correct detected vulnerabilities

- + Non-intrusive orchestration of complementary scans
- + Centralization of results and actions in mySOC portal
- + Reduced time between discovery and remediation

We operate leading solutions:

mySOC for Vulnerabilities ensures the

- External and internal scans
- Asset maps
- Vulnerability Discoveries
- Spot 0-day and CVE scans
- Ticket prioritizations
- Compliance

mySOC performs the essential actions

- + Campaign planning and authentications
- + Assets cartography enhancement
- + Vulnerability risk assessment
- + Management by dashboards and KPIs
- + Monitoring of vulnerability's lifecycle
- + Remediation and patching plans

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
