STOP MORE.

< 3%	1H10
False positive rate	Response time to a critical event

Monitor everything

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

Detect anything

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

Act better

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

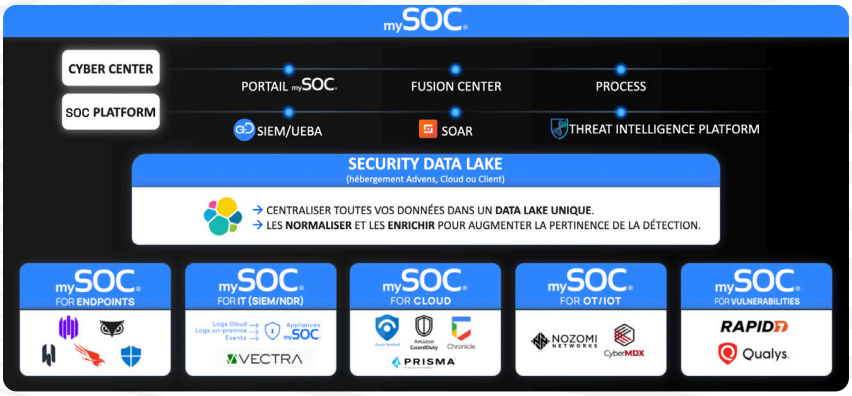
Collaborate smartly

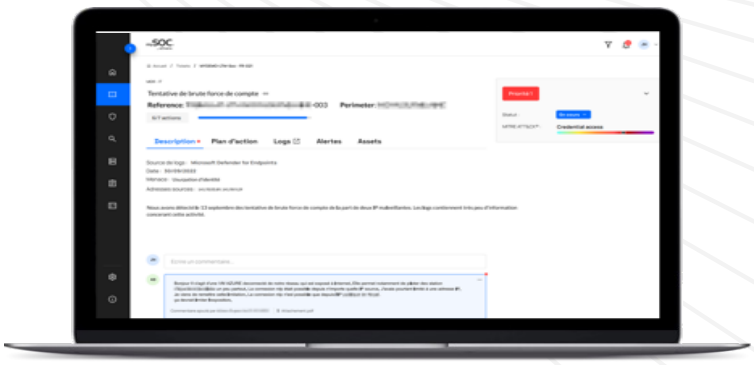
Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

mySOC®protects all your environments by providing you with complete visibility of your risks, your vulnerabilities and the external threat.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection





With mySOC portal, manage your security at your fingertips

"For three years, Advens has been operating TF1's SOC, three years during which Advens has demonstrated numerous qualities: the speed of the teams in charge of deployment in a challenging environment, the efficiency and scalability of the deployed technical solutions, and the expertise of the operational teams."

Jean GRAS •
IT Operations Director – TF1

Benefits mySOC® MDR:

- Detection and qualification of security events 24/7
- Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- Continuous optimization with collective detection intelligence
- Enrichment of detections by public and private CTI
- Targeted and fast remediation thanks to SOAR playbooks

mySOC® for Endpoints

Complete, 24/7 protection, optimized by our experts

mySOC for endpoints continuously protects your most exposed assets, regardless of their location. We combine threat prevention, attack detection and remediation capabilities to ensure the continuity of your operations.

Adapt detection to the evolution of the threat + **Detect attacks as they happen** + **Drive necessary actions until total remediation**

- **Optimizing the efficiency of your EDR's detection rules.**
- **Qualification of security alerts and incidents reported 24/7.**
- **Management of essential remedial actions.**

We operate the market leading EDRs:

cybereason

Microsoft Defender for Endpoint

HarfangLab

SentinelOne

mySOC for Endpoints protects you from:

- Malware
- Ransomware
- Zero day attacks
- Advanced Persistent Threats (APT)
- Suspicious activities
- Abnormal behaviors
- Fileless attacks
- Lateral movements

mySOC supports essential actions:

- **Automation of threat hunting**
- **Removal of doubts, processing of false positives**
- **Instant isolation of involved devices**
- **Quarantine malicious files**
- **Suspicious processes monitoring and shutdown**
- **Rollback to previous versions of files and registry keys**
- **Enrichment by indicators of compromise**
- **Version management and configuration of EDRs**

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
