

SEE MORE. STOP MORE.

mySOC[®]
by Advens

24/7 Managed Detection & Response for all your environnements

SEE MORE.

> 700 000
Endpoints under
24/7 supervision

> 90%
MITRE ATTACK[®]
coverage

Monitor everything

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

Detect anything

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

STOP MORE.

< 3%
False positive rate

1H10
Response time
to a critical event

Act better

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

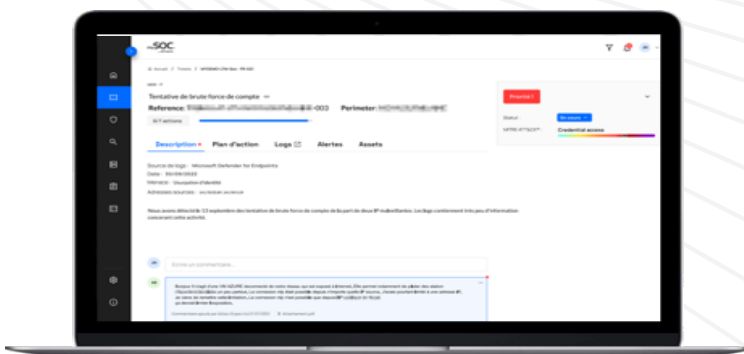

Collaborate smartly

Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

mySOC[®] protects all your environments by providing you with complete visibility of your risks, your vulnerabilities and the external threat.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection

With mySOC portal, manage your security at your fingertips

"For three years, Advens has been operating TF1's SOC, three years during which Advens has demonstrated numerous qualities: the speed of the teams in charge of deployment in a challenging environment, the efficiency and scalability of the deployed technical solutions, and the expertise of the operational teams."

Jean GRAS •
IT Operations Director - TF1

Benefits mySOC[®] MDR:

- + Detection and qualification of security events 24/7
- + Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- + Continuous optimization with collective detection intelligence
- + Enrichment of detections by public and private CTI
- + Targeted and fast remediation thanks to SOAR playbooks

mySOC[®] for IT (SIEM/NDR)

Protection of your information system 24/7, optimized by our experts

mySOC for IT centralizes, enriches and correlates data from your application, perimeter and infrastructure equipment to detect all abnormal behavior. Our analysts and detection engineers, augmented by our machine learning algorithms, support you until the complete resolution of security incidents.

**Model and
analyze security
alerts**

**Understand
the impact of attacks
on equipment**

**Effectively
manage incident
resolution**

- + Reception, standardization and enrichment of logs and alerts.
- + Detections of IOCs and behavioral anomalies in your network.
- + Instant and accurate response to security alerts.
- + Full control of data storage and analysis costs.

**mySOC for IT analyzes
all your logs and leading
network sensors**

mySOC for IT protects you from:

- Propagations in the information system
- Network malware deployments
- Data exfiltration
- Exploits of vulnerabilities
- Connections to malicious sites
- Dangerous executable downloads

mySOC supports essential actions:

- + Feared incident monitoring
- + Qualification of reported security alerts and incidents
- + Multi-channel notification (ticket, email, SMS) of incidents
- + Information system security action plan
- + Remediation on equipment (FW, Proxy, AD)

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
