

SEE MORE. STOP MORE.

mySOC[®]
by Advens

24/7 Managed Detection & Response for all your environnements

SEE MORE.

> 700 000
Endpoints under
24/7 supervision

> 90%
MITRE ATTACK[®]
coverage

Monitor everything

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

Detect anything

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

STOP MORE.

< 3%
False positive rate

1H10

to a critical event

Act better

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

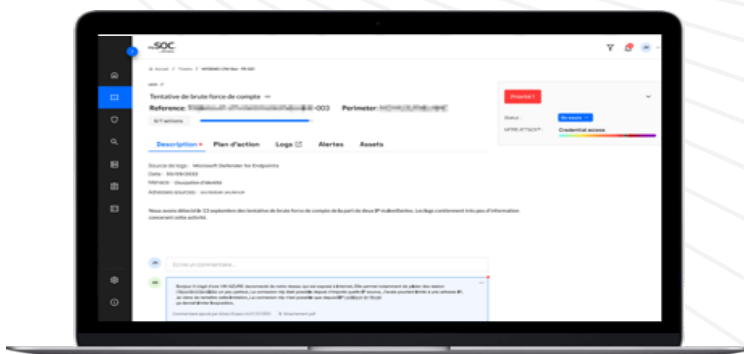

Collaborate smartly

Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

mySOC[®] protects all your environments by providing you with complete visibility of your risks, your vulnerabilities and the external threat.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection

With mySOC portal, manage your security at your fingertips

"For three years, Advens has been operating TF1's SOC, three years during which Advens has demonstrated numerous qualities: the speed of the teams in charge of deployment in a challenging environment, the efficiency and scalability of the deployed technical solutions, and the expertise of the operational teams."

Jean GRAS •
IT Operations Director – TF1

Benefits mySOC[®] MDR:

- + Detection and qualification of security events 24/7
- + Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- + Continuous optimization with collective detection intelligence
- + Enrichment of detections by public and private CTI
- + Targeted and fast remediation thanks to SOAR playbooks

mySOC[®] for OT / IoT

Secure your OT and IoT environments 24/7

Cyber risk is a strategic subject for industrial environments. mySOC for OT/IoT provides full visualization and protection to your critical environments without disrupting production. Alerts from logs or OT / IoT network probes are assessed by our analysts and remediation is co-operated with your operational teams

**Protect industrial
information
systems**

**Addressing the
specifics of industrial
environments**

**Monitor your industrial
assets without
disrupting operations**

- + Correlation of industrial events in a unified surveillance plan.
- + Qualification of security alerts and incidents reported 24/7.
- + Support from renowned experts in industrial information systems

We operate leading solutions:

Cyber**MDX**

NOZOMI
NETWORKS

mySOC for OT / IoT protects you from

- Uncontrolled 4G/5G remote access
- Unusual traffic between devices
- Abnormal instructions on PLCs
- Connections of illegitimate equipment
- Misuse of assets
- Uses of unauthorized protocols

mySOC supports essential actions:

- + Analysis of industrial protocols (Modbus TCP, PROFINET...)
- + Mapping of industrial assets
- + Vulnerability management
- + Modeling of nominal operation
- + Prioritization of security alerts
- + Orchestration of remediation action plans

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
