

SEE MORE. STOP MORE.

mySOC<sup>®</sup>  
by Advens

## 24/7 Managed Detection & Response for all your environnements

### SEE MORE.

> 700 000  
Endpoints under  
24/7 supervision

> 90%  
MITRE ATTACK<sup>®</sup>  
coverage

#### Monitor everything

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

#### Detect anything

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

### STOP MORE.

< 3%  
False positive rate

1H10  
Response time  
to a critical event

#### Act better

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

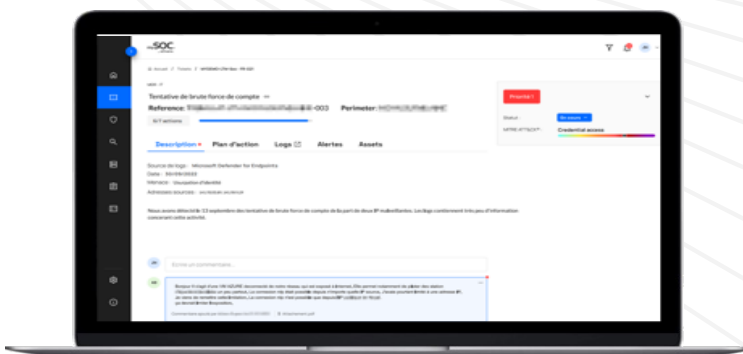

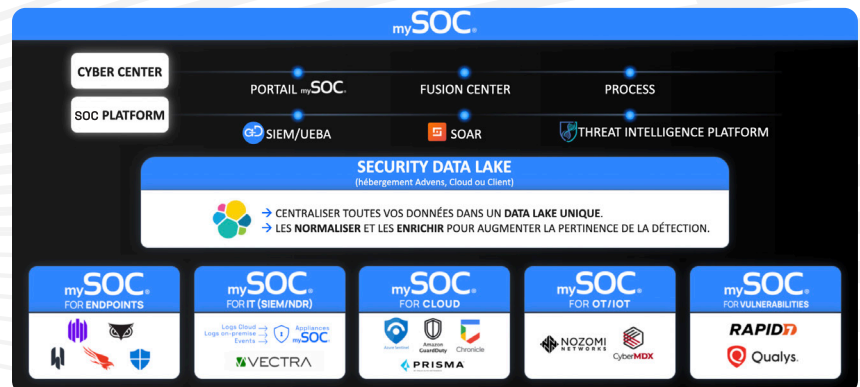

#### Collaborate smartly

Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

mySOC<sup>®</sup> protects all your environments by providing you with complete visibility of your risks, your vulnerabilities and the external threat.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection

With mySOC portal, manage your security at your fingertips

"For three years, Advens has been operating TF1's SOC, three years during which Advens has demonstrated numerous qualities: the speed of the teams in charge of deployment in a challenging environment, the efficiency and scalability of the deployed technical solutions, and the expertise of the operational teams."

Jean GRAS •  
IT Operations Director - TF1

### Benefits mySOC<sup>®</sup> MDR:

- + Detection and qualification of security events 24/7
- + Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- + Continuous optimization with collective detection intelligence
- + Enrichment of detections by public and private CTI
- + Targeted and fast remediation thanks to SOAR playbooks

# mySOC<sup>®</sup> for Cloud

## Protect your cloud activities 24/7

mySOC for Cloud allows a global approach on all your cloud environments thanks to its extended visibility and the precision of its detection.

Protect dynamic and complex environments

Centralize all the protection of cloud environments

Understand native cloud attack techniques

- + 24/7 monitoring of your infrastructures, identities and data.
- + Correlate cloud events in a single monitoring plan
- + Precise, fast and adapted response directly in the targeted environments.

### mySOC for Cloud relies on Cloud monitoring solutions

Chronicle

Microsoft Sentinel

### mySOC for Cloud protects you from:

- Malware and viruses
- Unauthorized access attempts
- Abnormal traffic patterns
- Unusual data transfer activities
- Malicious Employee Behaviors
- Advanced persistent threats

### mySOC supports essential actions:

- + Cloud event monitoring
- + Cross-platform identity analysis
- + Correlation of on-premises and cloud activities
- + Unified visibility in a single monitoring plan

### About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
