

SEE MORE. STOP MORE.

mySOC[®]
by Advens

24/7 Managed Detection & Response for all your environnements

SEE MORE.

> 700 000
Endpoints under
24/7 supervision

> 90%
MITRE ATTACK[®]
coverage

Monitor everything

From OT to IT, including cloud and networks, mySOC integrates all types of logs and detection sensors to monitor all of your perimeters

Detect anything

Our behavioral AI/ML algorithms combined with up to date indicators of compromise allow immediate detection, analysis and prioritization of known and unknown attacks.

STOP MORE.

< 3%

Response time
to a critical event

Act better

Our experts contextualize the alerts coming from your information system. Automated orchestration into co-operated playbooks ensures targeted and instantaneous deployment of the necessary security measures.

Collaborate smartly

Gain complete and dynamic visibility of your security from our portal, the effectiveness of your cyber defense operations and the means to collaborate with your service providers.

mySOC[®] protects all your environments by providing you with complete visibility of your risks, your vulnerabilities and the external threat.

Our analysts rely on our mySOC Open XDR platform to prevent, detect and react in real time to security incidents at your side.

Our cyber experts enrich the detection with threat intelligence and continuously optimize your means of detection

With mySOC portal, manage your security at your fingertips

"For three years, Advens has been operating TF1's SOC, three years during which Advens has demonstrated numerous qualities: the speed of the teams in charge of deployment in a challenging environment, the efficiency and scalability of the deployed technical solutions, and the expertise of the operational teams."

Jean GRAS •
IT Operations Director – TF1

Benefits mySOC[®] MDR:

- + Detection and qualification of security events 24/7
- + Holistic analysis on Cloud, hybrid and OT/IOT perimeters
- + Continuous optimization with collective detection intelligence
- + Enrichment of detections by public and private CTI
- + Targeted and fast remediation thanks to SOAR playbooks

mySOC[®] for Vulnerabilities

Reduce your risks by controlling your vulnerabilities

To reduce the attack surface, mySOC for Vulnerabilities creates an inventory of the vulnerabilities present across all your IT, web and cloud environments. Our cyber experts support your teams in orchestrating scans, prioritizing flaws and managing their correction.

Analyze heterogeneous environments individually

Run scans without disrupting operational activity

Prioritize and correct detected vulnerabilities

- + Non-intrusive orchestration of complementary scans
- + Centralization of results and actions in mySOC portal
- + Reduced time between discovery and remediation

We operate leading solutions:

mySOC for Vulnerabilities ensures the

- External and internal scans
- Asset maps
- Vulnerability Discoveries

- Spot 0-day and CVE scans
- Ticket prioritizations
- Compliance

mySOC performs the essential actions

- + Campaign planning and authentications
- + Assets cartography enhancement
- + Vulnerability risk assessment
- + Management by dashboards and KPIs
- + Monitoring of vulnerability's lifecycle
- + Remediation and patching plans

About Advens

Advens is a European, independent and outstanding leader in cybersecurity. We are located throughout France (Paris, Lille, Lyon, Marseille, Toulouse, Bordeaux, Nantes and Rennes), Spain (Madrid, Barcelona, Bilbao, Valencia), Italy (Milan, Roma), Germany (Munich) as well as Quebec, and Tahiti.
